👤 About Me

My name is Bryan Gonzalez and I am a Front End Developer. I fell in love with Web Development from the moment I inserted my first image using CSS through the tutorial I found in FreeCodeCamp. I knew then that this was what I wanted to do. And that is why I have invested hundreds of hours to learning and perfecting my skills. With the help of my family, I have been able to dedicate at least 40 hours per week to learning. And I feel I am qualified and skilled enough now to help be an asset as a Front End Developer.

💼 Experience

These are the applications that I am most proud of, all of which can be found on my portfolio.

Watches Application -
- UI/UX Design intended to provide easy navigation
- Used Node.js, MongoDB, and Express to create API
- Utilized React as Front-End framework/library
- Single Page Application with React Router
- CSS3 styling along with Flexbox

Movie Application -
- Used the MovieDB public REST API
- Responsive design makes for effortless navigation
- Utilized React as Front-End framework/library
- SCSS for styling purposes
- Single Page Application with React Router
- Axios for Http Request

Animal Shelter Application -

- Used Petfinder public API
- Responsive Design with animations for pleasant navigation
- Utilized React as Front-End framework/library
- Single Page Application with React Router
- SCSS for styling purposes
- Axios for Http Request
